B.2. GRANT AND CONTRACT AWARDS

B.2.a. Active Grants

1. 2015-2017 2014-MU-CX-0102
NATIONAL INSTITUTE OF JUSTICE (Co-Investigator)
“Development of a brief elder abuse and neglect screener for Emergency Medical Services: **Detection of Elder abuse Through Emergency Care Technicians (DETECT)**”
Study description: The purpose of this project is to create and pilot test a tool for use by emergency medical technicians (EMTs) to increase detection and reporting of elder abuse and neglect. The

study design includes focus groups conducted with EMTs and Adult Protective Services employees in Fort Worth, Texas. Upon development, this tool will be pilot tested and implemented as a part of the protocol for EMTs at MedStar in Fort Worth, TX.

PI: Michael B. Cannell, University of North Texas Health Science Center

Total Funding: \$369,039

Total Subcontract Direct Costs: \$102,837

2. 2015-2018 1H79TI026072-01
SAMHSA Center for Substance Abuse Treatment (CSAT) (Co-Investigator)
"Enhancing Residential Treatment to Benefit Women in the Community"
PI: Dallas County Department of Criminal Justice
Description: The purpose of this collaboration with the Dallas County Department of Criminal Justice is to decrease the number of days that women in need of substance use treatment spend in jail. This program also seeks to understand how substance use treatment uptake impacts the likelihood of success (e.g., reduced use of drugs, employment, stable housing, and social connectedness) of women in Drug Courts over a 12-month follow-up period.
PI: Dallas County Department of Criminal Justice
Total Funding: \$318,092
Total Subcontract Direct Costs: \$73,561

3. 2016-2018
UNIVERSITY OF TEXAS SCHOOL OF PUBLIC HEALTH (FRONT OF THE ENVELOPE) (Principal Investigator)
"A Case-Control Study to Reduce Police Officer-Involved Shootings"
Description: This case-control study will assess whether military veteran officers or officers hired during periods of 'mass hiring' when large class sizes may compromise training quality (and an array of other factors) are at greater risk for involvement in shootings. Upon completion, this will be the most comprehensive dataset available to examine the intersection of contextual, training, and officer-level characteristics that most strongly predict officer involvement in shootings. This study represents a collaboration with the Dallas Police Department and the Caruth Police Institute.
Total Direct Costs: \$24,996

4. 2016-2017
HOGG FOUNDATION FOR MENTAL HEALTH (Principal Investigator)
Mental Health Peer Support Re-Entry Pilot Evaluation
Description: This study will evaluate the impact of Certified Peer Support Specialists (CPS) on recidivism, promote community tenure and encourage recovery of people in jail across each of the three project sites (Tarrant County, Harris County and the Rio Grande Valley). This pilot project was mandated by the Texas Legislature (RIDER 73).
Total Direct Costs: \$30,814

5. 2017
NIH/NIDA (Consultant)
In-Person vs. Computer Interventions to Increase Probation Compliance
Description: This study compared two intervention formats that target motivation to initiate and engage in substance abuse treatment among a group of probationers who have drug or alcohol treatment conditions. Four hundred drug and alcohol offenders in two probation sites (Baltimore, MD and Dallas, TX) were randomized to receive: 1) an in-person motivational interviewing session (MI), 2) a motivational computer program (MC), or 3) supervision intake and monitoring as usual (SAU). Primary outcomes included HIV risk behavior, alcohol and drug use, and criminal justice involvement.
Principal Investigators: Scott Walters and Faye Taxman

6. 2017 3016-266
National Institute of Justice and Office of Crimes against Women (Consultant)
Meta-analysis of violence against women and cancer among women
Description: The National Institute of Justice (NIJ) requests a systematic review and meta-analysis of literature in the field related to violence against women (including sexual assault, childhood sexual trauma, sexual violence or victimization, domestic violence, teen dating violence, stalking, and intimate partner violence) and cancer in adults (e.g., cervical cancer, breast cancer, ovarian, etc.). The resulting paper may become a precursor to further research and program development work, and lay possible groundwork for evaluation efforts sponsored by NIJ and partnering agencies.

Total Funding (2009-2019): \$1,811,162

B.2.c. Completed Grants

- 2012-2016 **UNIVERSITY OF TEXAS HEALTH SCIENCE CENTER AT HOUSTON SCHOOL OF PUBLIC HEALTH (Principal Investigator)**
Start-up package/Institutional support
Study description: The purpose of these start-up funds was to help Dr. Reingle set up her laboratory at the UT School of Public Health. Dr. Reingle is using these funds to purchase equipment and employ a graduate research assistant to collect pilot data for grant applications.
Funding: \$90,000
- 2013-2015 **NORTH CENTRAL TEXAS COUNCIL OF GOVERNMENTS (Consultant)**
“CHOICES Curriculum for at-risk youth in Dallas”
Description: This project funds the implementation of the CHOICES program for 800 at-risk youth in two middle schools in the Dallas Independent School District. The purpose of this trial is to demonstrate that CHOICES is an effective program for preventing school dropout and delinquency among middle school age youth.
PI: Nadine Connell, University of Texas at Dallas
Total Funding: \$240,000
- 2014-2015 R01 AA020542 (Co-Investigator)
NIH/NIAAA
“Social, Familial, Neighborhood Factors and Drinking in Puerto Rico”
Description: Heavy drinking and alcohol-related problems are a serious health and social problem in Puerto Rico; yet, there is a dearth of up-to-date epidemiological data on the social, familial and neighborhood factors that determine drinking and its consequences on the island. Knowledge about these factors is important for implementing prevention interventions at the individual and neighborhood level. This project will study this complex array of factors in a random household sample of Puerto Rican adults in the San Juan metropolitan area.

“Development of a model to predict optimal security personnel staffing for hospitals”

Study description: To create an industry standard tool for hospital administrators to systematically determine the number of security officers (patrol and response personnel, as well as fixed post) needed based upon the unique characteristics of each hospital. Specifically, funding for this project was used to create a tool that can be used by hospital administrators to determine the optimal number of full-time equivalents for patrol and response personnel, as well as fixed post personnel, based upon the characteristics of their hospital.

Total Direct Costs: \$1,542

2012 **THE CAMPBELL COLLABORATION** (Co-Investigator)

A Systematic Review of Ethnicity, Gender, and Age as Moderators of Violent Recidivism.

Description: This study included a meta-analysis of the peer-reviewed literature on race, ethnicity, gender, age, and antisocial attitudes and recidivism after release from correctional facilities.

PI: Alex Piquero, University of Texas at Dallas

Total Direct Costs: \$12,000

2009-2016 **NIH/NIAAA and NIDA TRAVEL GRANTS** (Annually, 2009-2012; 2015-2016)
