

Office of Public Health Practice
Brownsville Regional Campus
Student Practicum Evaluations
AY 2006-07

INTRODUCTION

A practicum is a planned, supervised, and evaluated “hands-on” experience that allows students to use the knowledge and skills acquired in the classroom. The practicum is directly related to the academic goals and professional interests of the students. The practicum is population based and addresses a need identified by the host organization. The practicum is an essential part of the curriculum and is a requirement of the Council on Education for Public Health (CEPH), the accrediting body of Schools of Public Health.

During the 2006-2007 academic year, 3 students from Dallas Regional Campus completed a practicum evaluation. Students and community preceptors completed evaluations at the end of the semester. About two weeks before the end of the semester, Survey Monkey™ formatted evaluation forms were sent to students and community preceptors via email. The average annual response rates for students and community preceptors were 94% and 76% respectively.

In an effort to increase response rates, students and preceptors were contacted three times after the electronic evaluations were distributed.

STUDENT RESPONSES

Primary Campus Location

Brownsville (n = 3)

Division

- 100% General

Type of Organization

- 67% University/College System
- 33% Primary/Secondary Education

Sites

- Besteiro Middle School
- School Of Public Health
- University of Texas at Brownsville

Practicum Topics

- Gain familiarity with statistical programming with SAS
- Become familiar with the field aspect of research studies
- Assist in development of evaluation methodology for Pasarla Bien program

Final Product

- 33% Instrument/Protocol
- 33% Report
- 33% Thesis

Weekly Time Commitment by Student (Hours/Week)

- All students enrolled at the Brownsville Regional Campus spent 12 hours or more working on practicum related activities
- All students enrolled at the Brownsville Regional Campus counted their practicum experience for 3 credit hours or more

Effectiveness of Learning Experience

As indicated in the table below, students reported that their practicum provided an effective learning experience across eight competencies

Question	Rating on a scale of 5.00 Average	SPH Average
Developing skills to work as a team member	4.67	4.46
Navigating work environment to accomplish objectives	4.67	4.45
Developing problem-solving skills	4.67	4.49
Working with diverse groups and cultures	4.67	4.41
Understanding the health goals of the organization	4.33	4.42
Formulating an idea from conception to completion	5.00	4.48
Developing an understanding of public health practice	4.33	4.39
Developing leadership skills	4.00	4.31

Student Satisfaction with Practicum

- All students reported that the practicum experience was effective, with 33% indicating that the practicum experience was very effective
- All students reported that their practicum prepared them for job opportunities

Recommendation of Site

- All students reported that they would recommend their community site

Student Contact with Preceptors during Practice Experience

- 33% of students met with their community preceptor 10 times or more
- Face-to-face was the most common form of communication
- All students reported that the weekly commitment was appropriate

Community Preceptor Attributes

Question	Rating on a Scale of 5.00 Average	SPH Average
Experienced in his/her field of work	4.33	4.78
Flexible and open to making changes to suit my needs as a student	5.00	4.70
Willing to offer suggestions and directions when needed	4.67	4.56
Available to answer questions and provide support	4.33	4.65
Helpful in accomplishing project milestones	4.00	4.52
Available to provide useful feedback concerning my work	4.00	4.55

Student Satisfaction with Community Preceptors

- All community preceptors were rated as above average, with 67% rated as very good

Faculty Sponsor Attributes

Question	Rating on a Scale of 5.00 Average	SPH Average
Flexible to suit my needs as a student	5.00	4.51
Willing to offer suggestions when needed	5.00	4.54
Available to provide useful feedback concerning my work	5.00	4.44
Helpful in accomplishing project milestones	5.00	4.37

Student Satisfaction with Faculty Sponsors

- All faculty sponsors were rated as very good

CONCLUSIONS

This evaluation demonstrates the win-win nature of applying classroom learning to the “real world.” Students overwhelmingly reported that the practice experience helped them develop problem solving skills and become more familiar with public health practice. Community preceptors were highly impressed with the students’ skills, motivation, maturity, and initiative. Overall, 95% of the community preceptors reported that they would be willing to accept

students for future practice experiences; and 91% of the students believed their practice experience was complimentary in preparing them for the job market.
