Epidemiology Course Requirement

**Policy:** All master’s and doctoral students must take at least one Epidemiology course as part of their degree program to graduate.

**Effective:** Fall 2011

**Who does this effect:** All UTSPH students entering in the Fall 2011 and after must take at least one Epidemiology course as part of their degree program to graduate.

MPH students are already required to take Epidemiology as a part of the core course requirement.

MS, DrPH and PhD students will need to complete at least one Epidemiology course as a part of their degree program if it is not already included in the degree plan.
