Health of Houston Survey 2010

The University of Texas Health Science Center at Houston
School of Public Health • Institute for Health Policy

To improve the health in our communities, timely information is necessary to identify areas of greatest need.

The University of Texas School of Public Health conducted a survey on the health of people living in the Greater Houston area and the health of your children and factors that affect health, neighborhood issues, and building a better future for residents of Houston and its environs.

This information will help local, state, and federal health agencies in planning for the health and safety needs of the community.
