Designed for aspiring biostatisticians and data scientists alike, our PH 1998: Communication, Collaboration and Leadership for Biostatisticians and Data Scientists course is designed to help equip students with valuable leadership and communication skills that are essential to every domain of the workforce and complement our education program's curriculum.

**Course Objectives:**

- Effectively communicate statistical concepts and ideas for specific audiences
- Learn effective oral presentation and communication skills
- Learn how to play a leadership role under different environments
- Learn how to promote the importance of statistics and data science
- Learn how to easily and quickly navigate professional collaboration
- Learn skills in preparing and writing data analysis plans and reports
- Understand the differences of statistical or data science job environments
**Course Spotlight**

**PH 1998: Communication, Collaboration and Leadership for Biostatisticians and Data Scientists**

The course is taught from 2:00 pm to 4:50 pm on Fridays in room E-505. Prospective students should note this course is a part of our robust Data Science curriculum.
