

Isaac DeSouza

Engineer, Bureau of Pollution Control and Prevention, Houston Health Department

Isaac DeSouza is an Engineer for the Houston Health Department's Bureau of Pollution Control and Prevention (HHD-BPCP). He has been involved as an Environmental Investigator, and Special Initiatives of the bureau's air investigations since 2005. His duties include air quality monitoring and evaluations, assisting Environmental Investigators for technical support, COH litigation support and the research of a variety of projects. He also provides comments for TCEQ site draft permits, TCEQ and EPA new rules and regulations. He holds BS degrees in Mechanical Engineering and Business Administration and has 25 years of extensive experience in the private sector as a Project and Manufacturing Engineer, Technical Leader, and Environmental Health and Safety Manager. He received the Owens Corning most prestigious award, the "Gala Award", for valuable contributions in the implementation of new processes to manufacture innovated new products in the Roofing Systems Division manufacturing plants.
