I got my COVID-19 test. Now what?

**WHAT’S YOUR COVID-19 TEST RESULT?**

**NEGATIVE**

**WHAT TYPE OF TEST?**

HOME

**DO YOU HAVE SYMPTOMS?**

YES

It could be a false negative. Get a lab test or take another home test 24-36 hours later. Wear a well-fitting mask around others, at home and in public.

NO

Chances are, you’re negative. Go back to normal activities. Monitor for developing symptoms and retest if necessary.

LAB

**DO YOU HAVE SYMPTOMS?**

YES

Chances are, you’re negative. Go back to normal activities. Monitor for developing symptoms and retest if necessary.

NO

**ARE YOU UP TO DATE* ON VACCINES?**

**YES**

That’s great! For more protection, wear a mask around others in public spaces.

**NO**

Get vaccinated to protect yourself and others from serious illness, hospitalization, and death. Unless in isolation, wear a mask around others in public spaces.

**POSITIVE**

Isolate at home for at least 5 days. Talk to your doctor and monitor your symptoms. Notify your close contacts to stop the spread. Wear a well-fitting mask around others at home. Before ending isolation: get a follow-up lab test; consult with your doctor if you were severely ill or have a weakened immune system.

**ARE YOU UP TO DATE* ON VACCINES?**

**YES**

If you’re not vaccinated, talk to your doctor about when to get vaccinated after recovering from COVID-19.

**NO**
