COVID-19 Rapid Response Requests

Since the start of the pandemic, Texas legislators have expressed the need for access to accurate information in a timely manner from experts in the field. As a result, the Texas Research-to-Policy Collaboration (TX RPC) Project has created multiple reports and/or one-pagers using Texas data on public health topics of interest expressed by Texas legislators. If you would like to request additional information on a public health topic related to the upcoming legislative session, please complete the following form.

ACCESS FORM HERE

The TX RPC Project Team wants to remind you that all of our resources are available on our website. We hope these resources are valuable to your respective offices.

- Michael & Susan Dell Center for Healthy Living Webinars (includes COVID-19 specific webinars)
- TX RPC Resources for Improving Measurable Impact (resources available to policymakers to provide facts and evidence on health-related topics)
- TX RPC Newsletters Archive
- Texas Legislative Bill Tracker
- Texas Child Health Status Reports and Toolkits

The TX RPC Project Team wants to share our recently released reports:

- COVID-19: Impact of Adult Obesity on Health Outcomes
- COVID-19: Impact of Childhood Obesity on Health Outcomes
- SNAP Utilization and Eligibility in Texas and Texas Legislative Districts

Resources from TX RPC Members and Organizations

UTHealth and Texas DSHS Launch Nation's Largest COVID-19 Serological Testing Assessment
Steven Kelder, PhD - UTHealth School of Public Health in Austin
Harold W. (Bill) Kohl, III, PhD - UTHealth School of Public Health in Austin
TX RPC Network Members, Drs. Kelder, Kohl, Messiah, and Valerio-Shewmaker are part of the collaborative team managing the Texas Coronavirus Antibody Response Survey (CARES) project in partnership with Texas Department of State Health Services (DSHS), Clinical Pathology Laboratories (CPL), and the UT System. Texas CARES seeks to understand the human antibody response to SARS-CoV-2, the virus that causes COVID-19. Texas CARES aims to learn more about the number of people who have been infected in Texas, follow the spread of infection over time, understand risk factors for the disease, and inform planning for future health care needs due to COVID-19.

**Key Takeaways:**
- Texans who participate in this survey will provide valuable information about how COVID-19 antibodies work which can in turn inform local and state policy, as well as safety procedures.
- The survey team is looking to enroll a diverse population of participants to gather insights on why some individuals infected with the virus are asymptomatic and how that affects their antibody response.
- Eligible participants include: school-age children 5-17 years old; teachers and education professionals, employees in retail, business or service sectors; and patients at community clinics.

**Highlights from TX RPC Members Conducting COVID-19 Research**

**Rising COVID-19 Case Counts in Harris County**
Shreela Sharma, PhD - UTHealth School of Public Health in Houston

Shreela Sharma, TX RPC Network Member, was quoted in the Houston Chronicle. "I'd say we're currently in a yellow zone, not a red zone like we were in mid-summer nor a green zone, where we're in control," said Sharma.

**Key Takeaways:**
- Though experts acknowledged it’s difficult to pinpoint the causes of the uptick, many used the same phrase to describe one big culprit: COVID fatigue.
- A surge in COVID-19 case counts is expected because winter will drive people indoors, particularly for the holidays.
- Due to the COVID-19 case counts increasing, we need to be more vigilant, and practice social distancing, wear face masks, and wash our hands.

**Sick of COVID-19?**
Jay Maddock, PhD - Texas A&M University School of Public Health
As the pandemic drags on, following COVID-19 prevention guidelines can feel like more and more of a challenge. Pandemic fatigue is real, and it's draining to stay on high alert month after month. Understanding how to cope might help people strengthen their resolve. In this article Dr. Maddock, TX RPC Network Member, explains COVID fatigue and suggests tactics to help people stay safe by protecting their mental health and well-being.

Key Takeaways:

- With all kinds of health-related behavior changes - including physical activity, eating healthy, and decreasing tobacco use - at least half of those participating in those behavior changes relapse within six months.
- When you see people socializing without masks and skipping physical distancing, it looks "normal" and could make you more likely to forgo those behaviors yourself.
- Social isolation can lead to a variety of poor health outcomes including hypertension and poorer sleep.

TX RPC Partner Events

New Ideas for the New Normal
Texas Action for Healthy Kids 2020 Virtual Summit

Texas Action for Healthy Kids will host a virtual summit on Monday, November 16th from 11:30am - 5:30pm and Tuesday, November 17th from 8:30am - 12:00pm. TX RPC Network Members involved in the summit include Dr. Harold W. Kohl moderating the "Town Hall Session - What is the New Normal?", Dr. Deanna Hoelscher presenting "Anticipation! 87th Legislative Session" with TX RPC Advisor, Joel Romo, and Alice Kirk moderating "The Chew", presenting "Chew Review", and moderating "Wrapping it All Up!"

Payment/Delivery Reform and the COVID-19 Pandemic: Help or Hindrance?
Dell Med Grand Rounds: Lewis Sandry, MD, FACP

The University of Texas at Austin, Dell Medical School will host their next installment of Dell Med Grand Rounds featuring Lewis Sandy, M.D., FACP on Wednesday, December 2nd from 5:00-6:00pm. Dr. Sandy is the executive vice president of clinical advancement at UnitedHealth Group, a diversified health care company dedicated to helping people live healthier lives and helping make the health system work better for everyone. At UnitedHealth Group he focuses on clinical innovation, payment/delivery reform practice and policy, and physician/health professional collaboration.

Event Highlights:
- Dell Med Grand Rounds is a school-wide series that brings world-renowned speakers who are leaders in delivering and teaching about value-based health care. The event is open to the entire medical community in Austin as part of Dell Med’s mission to create a medical ecosystem built upon the foundation of value-based health care.
- Join the meeting to learn more about the impact of the COVID-19 pandemic on health
87th Legislative Briefing
Presentation of the Partnership for a Healthy Texas' 2021 Legislative Agenda

The Partnership for a Healthy Texas hosted a virtual briefing for lawmakers, their staff, and other external stakeholders to present their agenda for the 87th Legislative Session on Tuesday, November 10th from 12:00 - 2:00 pm. Presenters included Michelle Smith and Dr. Leah Whigham, TX RPC Network Members.

Event Highlights:
- COVID-19 has demonstrated the importance of an appropriately resourced public health infectious disease infrastructure. This same emphasis should be placed on chronic diseases, including obesity, that receive less attention than global pandemics but have a lasting impact on the health and wellbeing of Texans.
- Join the legislative briefing to learn more about how the Texas Legislature can put interventions in place to make all Texans healthier and more productive citizens.
