You will be asked to answer questions about your food choices and physical activity (exercise).

An adult will weigh you, measure your height, and write the results on the last page of the questionnaire.

No one at school or at home will see your answers, how tall you are, or what you weigh.

Taking part in this project is up to you. Your choice about taking part will not affect your grades in school or your ability to take part in any school activities.

After you complete the questionnaire and are measured for height and weight, the page with your name on it (Student Assent Form) will be removed. Your name will never be used after that.

By signing below, you agree to take part in this project.
The following questions are about what kids your age eat, what they know about nutrition, and their physical activity (exercise). Your answers will help us learn about students in Texas and will be used to design better health programs. Read each question carefully and pick the answer that is true for you. Mark that answer on your questionnaire as shown in the example below. **This is not a test**, and **there are no right or wrong answers**. Remember, your answers will be kept private.

**Marking Instruction:**
- Fill in bubble(s) completely
- To change your answer, erase completely
