Texas children aren’t meeting nutrition guidelines

The USDA Dietary Guidelines\(^1\) recommends focusing on a wide variety of fresh fruits and vegetables, whole grains, fat-free or low-fat dairy products, and high protein foods. They also recommend limiting added sugars and saturated fats and reducing sodium intake.

### Nutrition Crisis

- **On a given school day:**
  - Over 1.8 million (33%) of Texas children do not eat any vegetables.\(^2\)
  - Over 1.2 million (23%) of Texas children do not eat fruit.\(^2\)
  - 35% of 8th graders and 40% of 11th graders do not eat breakfast.\(^2\)
  - Over 90% of Texas children eat at least one sweet or salty snack (candy, frozen dessert, cakes, french fries, or chips).\(^2\)

### Current and Lifetime Risks

- A healthy diet is associated with better physical, psychological, and social health.\(^3\)
- Skipping breakfast leads to overweight & obesity.\(^4\)
- Children who eat more fruits & vegetables have lower body weight.\(^5\)
- A high sugar, low fiber diet is related to lower creativity test scores.\(^6\)

Over 1.2 million (23%) of Texas children do not eat fruit.\(^2\)

Over 90% of Texas children eat at least one sweet or salty snack (candy, frozen dessert, cakes, french fries, or chips).\(^2\)

### How we can improve Texas children’s nutrition

- Label food in school cafeterias, such as GO, SLOW, WHOA.\(^5,9\)
- Ensure all school children have access to a healthy breakfast
- Implement a proven coordinated school health program, such as CATCH.\(^10,11\)
- Limit unhealthy food & drink marketing to young children
- Ensure fast food kids meals default to healthy choices, such as milk or water instead of sugary drinks
Current Nutrition Guidelines

The US Department of Health and Human Services and Department of Agriculture advise following a healthy eating pattern across the lifespan. Their 2015-2020 Dietary Guidelines for Americans recommends focusing on variety, nutrient density, and quantity, limiting calories from added sugars and saturated fats, reducing sodium intake, and shifting to healthier food and beverage choices.

A healthy eating pattern includes a variety of vegetables, fruits, grains (at least half of which are whole grains) fat-free or low-fat dairy, a variety of protein-rich foods, and oils. A healthy eating pattern limits saturated fats and trans fats, added sugars, and sodium.

   The School Physical Activity and Nutrition (SPAN) Project is a surveillance system monitoring the prevalence of overweight/obesity in school-aged children in Texas conducted by researchers at the Michael & Susan Dell Center for Healthy Living. SPAN has been funded by the Texas Department of State Health Services since 2000 to conduct height and weight measurements across different grade levels.
