## Instructions for the Essay Questions

Please address all of the essay questions in one document and with the title “Last Name\_First Name Essays.pdf”. Be sure to number your responses for clarity and submit as a PDF document to [CPRITFellowships@uth.tmc.edu](mailto:CPRITFellowships@uth.tmc.edu).

The essays help us understand our applicants better and determine how well our program matches applicants and their expectations. Before responding, be sure to review the goals of the fellowship and other materials on the website at [go.uth.edu/innovation](http://go.uth.edu/innovation).

If possible, attend an information session (schedule posted on the webpage) or view a recording (to be posted on the webpage). It is also helpful if you review drafts with your advisor. The reviewers of your essays will come from a variety of backgrounds. Your essays *should be written so that they can be understood by someone outside of your field*, and organized as follows:

1. Brief description of your academic studies and research and/or clinically applied work experience and potential application to cancer prevention research. (300 words or less)
2. Your ideas for a research project, its significance and innovation for cancer prevention research, and its fit with the fellowship program. (300 words or less)
3. Your long-term career objectives and how the opportunities provided in the fellowship will assist you in achieving those objectives. Potential career domains may include academia, care delivery, entrepreneurship, industry, public health, research, or others. (250 words or less)
4. Your most significant achievement, individually or a part of a team, in the past 5 years. (This doesn't need to be in the academic realm.) Why do you value it, and what do you think it tells us about you? (250 words or less)
5. Describe a time when you faced an educational or employment challenge, setback, or failure. How did you address the situation? What did you learn about yourself? (250 words or less)
